28/02/2017- RALLY AND STREET PLAY ON FEMALE FOETICIDE

Introduction

Female feticide is the abortion of a female fetus outside of legal channels. It occurs in India for assumed cultural reasons that span centuries.

The frequency of female feticide in India is assumed to be an estimation derived from its high birth sex ratio that is the ratio of boys to girls at birth. The natural ratio is assumed to be between 103 and 107, and any number above it is considered as suggestive of female feticide. According to the decennial Indian census, the sex ratio in the 0 to 6 age group in India has risen from 102.4 males per 100 females in 1961, to 104.2 in 1980, to 107.5 in 2001, to 108.9 in 2011.

Activity

In the NSS camp at Kamshet volunteers and 3 NSS officers conduct a rally and street play on 'Female Feticides'. This street play and rally was really effective. volunteers have made various types of audio visual aids for the street play and rally. They give a good message to society. Rally starts from the Maharshi Karve Aashramshala and ends at Kamshet railway station. Through these rallies and street play NSS volunteers have given information about the importance of females in the world. NSS volunteers have prepared various types of slogans and A V. aids.

6/10/2018- RALLY AND STREET PLAY ON ROAD SAFETY

Introduction

Road traffic safety refers to the methods and measures used to prevent road users from being killed or seriously injured. Typical road users include pedestrians, cyclists, motorists, vehicle passengers, and passengers of on-road public transport (mainly buses and trams).

Best-practices in modern road safety strategies focus on preventing serious injury and death from vehicle crashes despite human fallibility.(Whereas, previous road safety paradigms assumed compliance with traffic regulations.) Safe road design is now about implementing a Safe System approach.

Road traffic crashes are one of the world's largest public health and injury prevention problems. The problem is all the more acute because the victims are overwhelmingly healthy before their crashes. According to the World Health Organization (WHO), more than 1 million people are killed on the world's roads each year.

Activity

volunteers of MKSSS Smt.Bakul Tambat institute of nursing education conducted a rally on Road safety in the Karvenagar area. Rally starts from Samstha at 9:00am and ends at 11:0am. Volunteers have made various types of A.V.aids. Through these rallies volunteers have given information about road safety. They have given information about traffic rules, signals, zebra crossing, etc.

02.10.2018 - STREET PLAY AND RALLY ON 'SWINE FLU'

Introduction

Swine influenza, also called pig influenza, swine flu, hog flu and pig flu, is an infection caused by any one of several types of swine influenza viruses. Swine influenza virus (SIV) or swine-origin influenza virus (S-OIV) is any strain of the influenza family of viruses that is endemic in pigs. As of 2009, the known SIV strains include influenza C and the subtypes of A known as H1N1, H1N2, H2N1, H3N1, H3N2, and H2N3.

2015 Indian swine flu outbreak refers to an outbreak of the 2009 pandemic H1N1 virus in India, which is still ongoing as of March 2015. The states of Gujarat and Rajasthan are the worst affected. India had reported 937 cases and 218 deaths from swine flu in the year 2014. By mid-February 2015, the reported cases and deaths in 2015 had surpassed the previous numbers.^[5] The total number of laboratory confirmed cases crossed 33000 mark with death of more than 2000 people.

Activity

volunteers and 2 NSS officers Mrs. Samina Mulani and Ms. Avantika Anturkar conduct rally and street play on 'Swine Flu'. This street play and rally was really effective.volunteers have made various types of audio visual aids for the street play and rally. In this awareness programme, volunteers give health education on Swine Flu causes, signs and symptoms, diagnosis and lab investigations, treatment and care, preventive measures.

RALLY AND STREET PLAY ON DENGUE FEVER

Introduction

Dengue fever is a mosquito-borne tropical disease caused by the dengue virus.

Symptoms typically begin three to fourteen days after infection.

This may include a high fever, headache, vomiting, muscle and joint pains, and a characteristic skin rash.

Recovery generally takes less than two to seven days.

In a small proportion of cases, the disease develops into the life-threatening dengue hemorrhagic fever, resulting in bleeding, low levels of blood platelets and blood plasma leakage, or into dengue shock syndrome, where dangerously low blood pressure occurs.

Dengue is spread by several species of mosquito of the Aedes type, principally.

The virus has five different types; infection with one type usually gives lifelong immunity to that type, but only short-term immunity to the others. Subsequent infection with a different type increases the risk of severe complications.

Activity

In the NSS camp at Kamshet NSS volunteers and NSS officers conduct rally and street play on 'Dengue Fever'. This street play and rally was really effective. NSS volunteers have made various types of audio visual aids for the street play and rally. They give a good message to society. Through these rally and street play volunteers have given information about causes of dengue fever, signs and symptoms, treatment of dengue fever

14/10/2019- RALLY AND STREET PLAY ON DIABETES MELLITUS

Introduction

Diabetes mellitus is a group of metabolic diseases characterized by hyperglycemia resulting from defects in insulin secretion, insulin action, or both. The chronic hyperglycemia of diabetes is associated with long-term damage, dysfunction, and failure of various organs, especially the eyes, kidneys, nerves, heart, and blood vessels.

Several pathogenic processes are involved in the development of diabetes. These range from autoimmune destruction of the β -cells of the pancreas with consequent insulin deficiency to abnormalities that result in resistance to insulin action. The basis of the abnormalities in carbohydrate, fat, and protein metabolism in diabetes is deficient action of insulin on target tissues. Deficient insulin action results from inadequate insulin secretion and/or diminished tissue responses to insulin at one or more points in the complex pathways of hormone action. Impairment of insulin secretion and defects in insulin action frequently coexist in the same patient, and it is often unclear which abnormality, if either alone, is the primary cause of the hyperglycemia.

Activity

In the NSS camp at Kamshet 25 NSS volunteers and 2 NSS officers conduct a rally and street play on 'Diabetes mellitus'. This street play and rally was really effective. NSS volunteers have made various types of audio visual aids for the street play and rally. They give a good message to society. Rally starts from the Maharshi Karve Aashramshala and ends at Kamshet railway station. Through these rallies and street play NSS volunteers have given information about causes, signs and symptoms, and treatment of Diabetes mellitus.

Conducting home delivery

A home birth is a birth that takes place in a residence rather than in a hospital or a birthing center. They may be attended by a midwife, or lay attendant with experience in managing home births. Home birth was, until the advent of modern medicine, the de facto method of delivery. The term was coined in the middle of the 19th century as births began to take place in hospitals.

Activity

MKSSS BTINE student of 1st year RGNM Ms. Puja Bhosale conducted home delivery of women in emergency. Her work was appreciated by giving her award named "Annanchi lek"
