22/08/2019- RALLY AND STREET PLAY ON ROAD SAFETY

Introduction

Road traffic safety refers to the methods and measures used to prevent road users from being killed or seriously injured. Typical road users include pedestrians, cyclists, motorists, vehicle passengers, and passengers of on-road public transport (mainly buses and trams).

Best-practices in modern road safety strategies focus on preventing serious injury and death from vehicle crashes despite human fallibility.(Whereas, previous road safety paradigms assumed compliance with traffic regulations.) Safe road design is now about implementing a Safe System approach.

Road traffic crashes are one of the world's largest public health and injury prevention problems. The problem is all the more acute because the victims are overwhelmingly healthy before their crashes. According to the World Health Organization (WHO), more than 1 million people are killed on the world's roads each year.

Activity

The NSS volunteers of MKSSS Smt.Bakul Tambat institute of nursing education were conducted rally on Road safety in the Karvenagar area. Rally starts from Maharshi Karve Stree Shikshan Samstha at 9:00am and ends at 11:0am.NSS Volunteers have made various type of A.V.aids. Through these rally and street play NSS volunteers have given information about road safety. They have given information about traffic rules, signals, zebra crossing, etc.

**REPORT ON
RALLY OF “ORGAN
DONATION”**

**MAHARSHI KARVE STREE SHIKSHAN SAMSTHA'S,
SMT. BAKUL TAMBAT INSTITUTE OF NURSING EDUCATION,
KARVE NAGAR, PUNE- 52**

11/09/2019: RALLY ON ORGAN DONATION RALLEY

Introduction:

Organ donation means that an organ is transferred from the body of one person to that of another person. This is done by a process called transplantation. The quality of life of the person who receives the organ is improved to various degrees. The donor is the person providing the organ to the recipient, who receives the organ through a surgery called transplantation. Organs that can be transplanted are the heart, kidneys, liver, lungs, pancreas, intestine, skin, and thymus.

Tissues include bones, tendons, corneas, heart valves, and veins. Worldwide, the kidneys are the most commonly transplanted organs, followed closely by the liver and then the heart. The cornea, bones, and muscles are the most commonly transplanted tissues. It is important for people to be aware that donating an organ or tissue changes the life of a fellow human being. The field of medicine called Regenerative medicine has made scientific advances to grow or create organs or tissues from cells. Still there is great demand for organs.

Activity:

The NSS volunteers of MKSSS Smt.Bakul Tambat institute of nursing education were conducted rally on Road safety in the Karvenagar area. Rally starts from Maharshi Karve Stree Shikshan Samstha at 9:00am and ends at 11:00am. NSS Volunteers have made various type of A.V.aids. Through these rally and street play NSS volunteers have given information about road safety. They have given information about importance of Organ donation and its benefits to the patients etc.
