INTRODUCTION

The Student and Faculty Exchange Program aimed to gather and discuss the perspectives of faculty and students from Bharati Vidyapeeth Nursing College, Mumbai, and Bakul Tambat Institute of Nursing Education, Pune, on the revised B.Sc. Nursing syllabus. This collaborative initiative provided a platform for participants to share their experiences, insights, and suggestions regarding the new curriculum, fostering an environment of continuous improvement and mutual learning.

A total of 62 participants attended the program from BTINE and BVCON. The program was guided by the head of the FON department, Dr. Shubhada Ponkshe. All the members of the FON department, including Ms. Ashwini Lande, Mrs. Avantika Anturkar, Ms. Aaditi Shirke, Ms. Vasudha Sapkal, and Ms. Nutan Waghela, actively participated in the program.

OBJECTIVES AND DISCUSSIONS

1. Promote Collaborative Learning

Discussion: Participants shared various collaborative learning techniques they found effective. There was a consensus that peer-to-peer learning and group projects significantly enhanced their understanding and retention of the material. Faculty members emphasized the

importance of creating a supportive learning environment that encourages questions and collaborative problem-solving.

2. Understand Student Perspectives:

Discussion: Students from the 2nd, 3rd, and 4th semesters shared their experiences with the revised syllabus. Many appreciated the increased focus on practical skills, although some found the workload challenging. Overall, students felt that the revised syllabus better prepared them for clinical practice, but suggested more structured guidance and support from faculty.

3. Encourage Inter-Semester Dialogue:

Discussion: The inter-semester discussions revealed differences in how each cohort adapted to the revised syllabus. Senior students offered tips and strategies to juniors, particularly regarding time management and effective study practices. This exchange was highly valued by participants, fostering a sense of community and mutual support.

4. Identify Areas for Improvement

Discussion: Both students and faculty provided constructive feedback on the syllabus. Common suggestions included the need for more integrated case studies, additional hands-on training sessions, and clearer assessment criteria. Participants also discussed the importance of continuous syllabus evaluation and incorporating student feedback in future revisions.

5. Discuss Teaching Strategies:

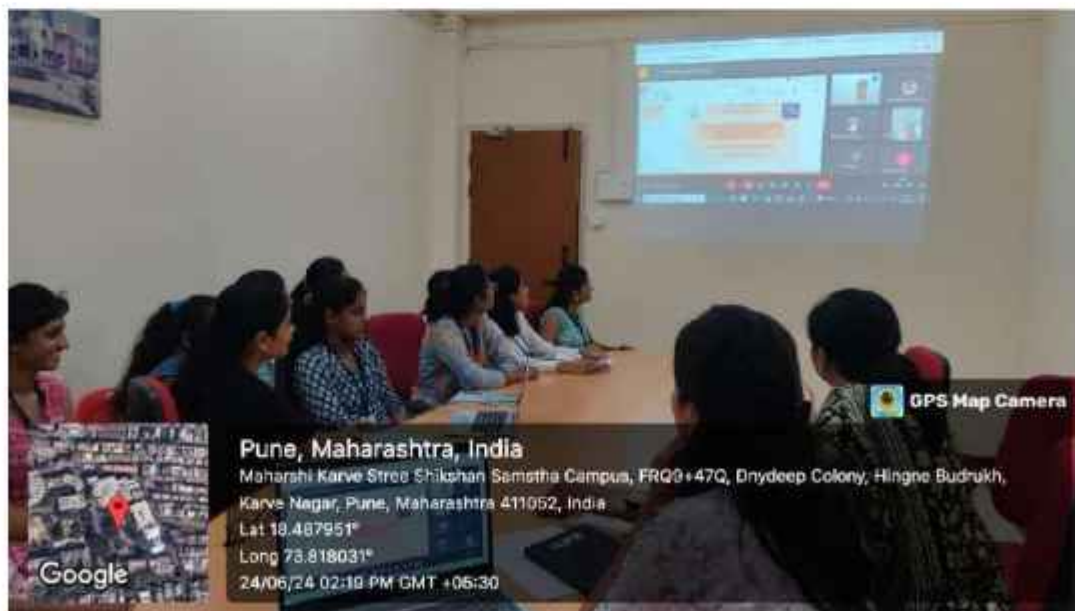

Discussion: Faculty shared various teaching methods they have employed with the new syllabus, including simulation-based learning, and flipped classrooms. Students responded positively to these methods but highlighted the need for consistency in teaching approaches across different courses. There was also a discussion on leveraging technology to enhance learning experiences. Students spoke positively about simulation-based learning, noting that using simulators built their confidence in performing procedures on real patients from their first year. They also found the OSCE (Objective Structured Clinical Examination) experience valuable in boosting their confidence for practical exams. However, teachers highlighted the difficulty in constructing checklists and establishing clear-cut evaluation criteria for OSCEs. Additionally, students expressed a need for nursing teachers to conduct classes in Anatomy,

Physiology, Biochemistry, Pharmacology, and Pathology, as they found these subjects challenging to understand when taught by non-nursing faculty.
