## 1. EXPERIENTIAL LEARNING

Experiential learning is an educational orientation aimed at integrating theoretical and practical elements of learning that emphasizes the importance of experience for learning. In nursing education, learning through experience is called “hands-on” learning, or learning by doing.

### FIELD VISIT:

Every program of UG and PG as per their course objectives we are providing them experiential learning in the form of field visit/educational visits. The main objective of educational visit to provide first-hand information through direct observation about place, object, activities, process in their natural settings to the students for learning.

### FIELD VISIT LIST:

SR. NO.	CONTENT
	<b>SEMESTER- I</b>
1	Health Care Agency a. Urban Public Health Care b. Deenanath Mangeshkar Hospital C. Indian Red Cross
2	Biomedical waste management
3	Central Sterilization Supply Department
4	Mahila Seva Mandal
5	Old Aged home
	<b>SEMESTER-II</b>
6	Health informatics department
7	Mahilashram Blind School
8	Kamayani Pratishtan & Sanshodhan Society, NGO Working for mentally challenged clients.
	<b>SEMESTER-V</b>
9	Anganwadi
10	Child guidance clinic (KEM Hospital)
11	Psychological testing unit, Sasoon hospital
12	Milk purification plant
13	CHC
14	PHC
15	Subcentre
16	Water supply and purification plant
17	Sewage disposal and treatment plant
18	Slaughterhouse
19	Begger's home
20	Orphanage

21	Old age home
22	Centre for physically challenged
23	Assisted living facility
24	Communicable disease hospital
25	Market
26	Rainwater harvesting center
27	Anganwadi
28	Visit to institutional organization regional/ national
29	Prison
30	Forensic laboratory
	<b>SEMESTER-VI</b>
31	Field visit to Hospital -regional/national organization
32	DY Patil Institute and Hospital including inventory store of the institute
33	Visit to one of the regulatory bodies MNC or MUHS
34	Peripheral health facility/Laqshya certified labour room
35	Infertility center (Virtual/videos)
36	Visit to deaddiction center
37	MIMH
38	Kamyani

## Community survey

Community survey is an important part of nursing practice. It is to be applicable under community health nursing. In our nursing program we used to give Rural Health Nursing posting in Poud and Kamshet areas and Urban Community Posting in Sutar Dawakhana, Kotharud, Pune. Students conduct health surveys in the community area for the identification of specific community health problems.

## Guest lectures

We the faculty of MKSSS.BTINE organize guest lectures for each program to provide expert content delivery on first aid short term course.

**Outdoor shooting**

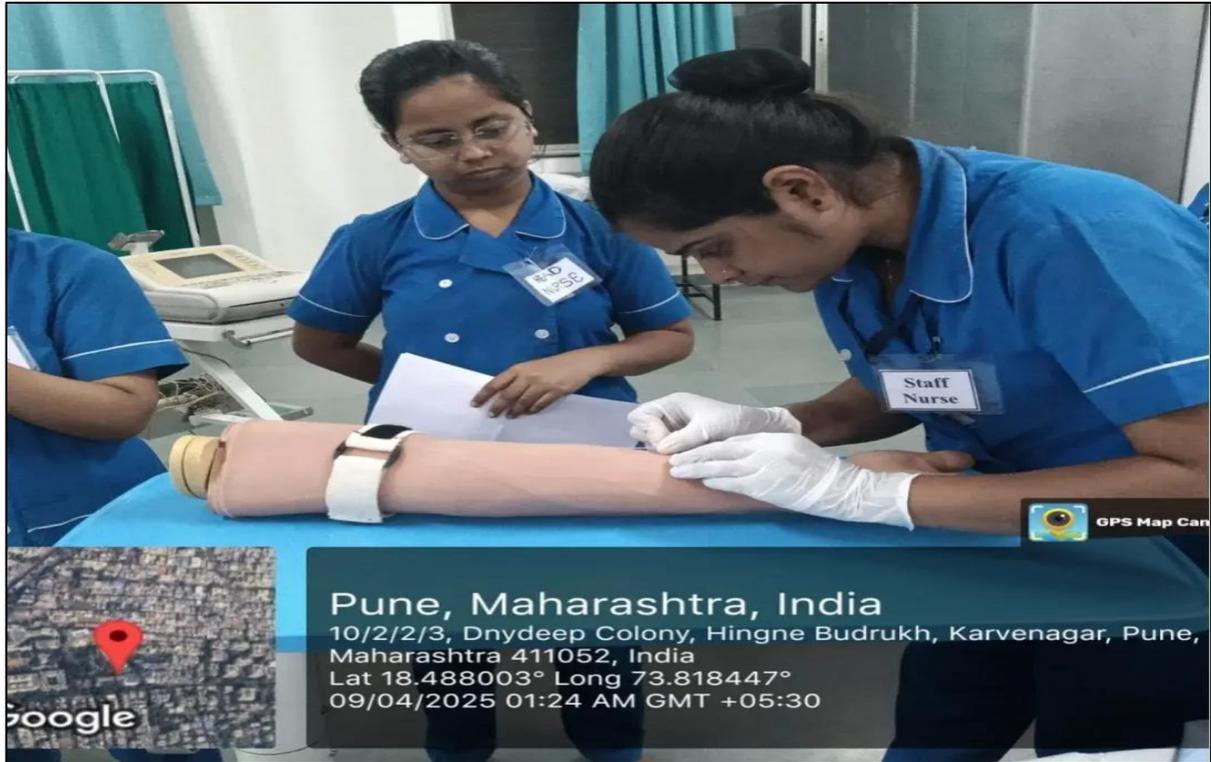

## Practical

Practical experience is a vital part of nursing education. It helps students apply theoretical knowledge in real clinical situations and develop skills required for safe, effective patient care.

## Practical and demonstration

Practical and demonstration is an essential component of the nursing practice that paves way for student nurses to gain knowledge of the nursing procedures. It enables them to grasp ideas of what nurses do in the hospitals or communities when they take care of patients and of how they do these procedures to them.

## Workshop on financial literacy

We the faculty of MKSSS.BTINE organize guest lectures for each program to provide expert content delivery on the specific non nursing courses for the clarification of the concept of the respective courses.

## PARTICIPATORY LEARNING

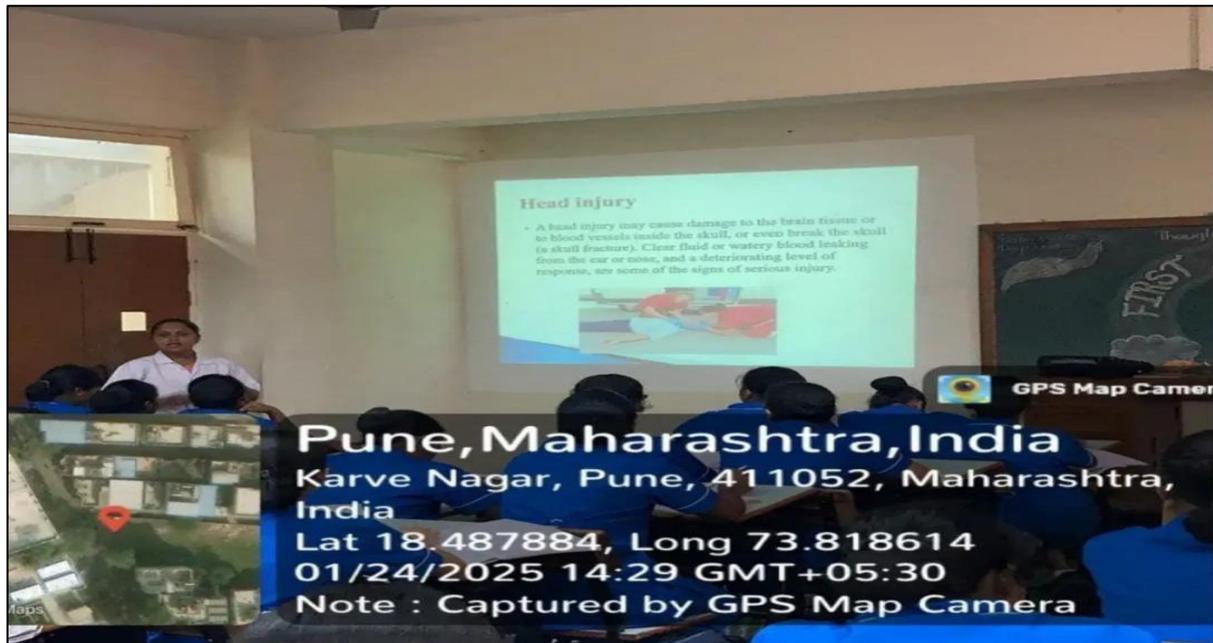

### Group Project

Completing tasks in groups helps students to develop important skills like critical thinking and debating. In addition, teamwork may reduce the number of issues related to burnout in nurses. Improve clinical performance.

## Presentations

Presentations are a necessary and important part of nursing. They allow nurses to impart and disseminate knowledge to educate and persuade colleagues to adopt new ways of working, and engage patients and colleagues in clinical projects.

## MICRO TEACHING:

The micro-teaching method enables nursing students to listen, observe and practice as much as possible while learning skills. It focuses on sharpening and developing specific teaching skills and eliminating errors. It enables understanding of behaviors important in classroom teaching. It increases the confidence of the learner. Microteaching is a training technique which requires a student teacher to teach a single concept using specified teaching skill to a few pupils in a short duration of time.

## School health program

School Health Program will provide benefits to the Reduction in dropout rate Enhancement of quality of education and learning outcomes Improvement in health conditions of young population Disease control and an overall improvement in health conditions in the society at large. School nurses receive no other medical care. The goal of the School Nurse is to promote a safe and healthy community in which the students will be encouraged to become life-long learners, self-managers and self-advocates for health, education and other issues.

### Audio visual aid

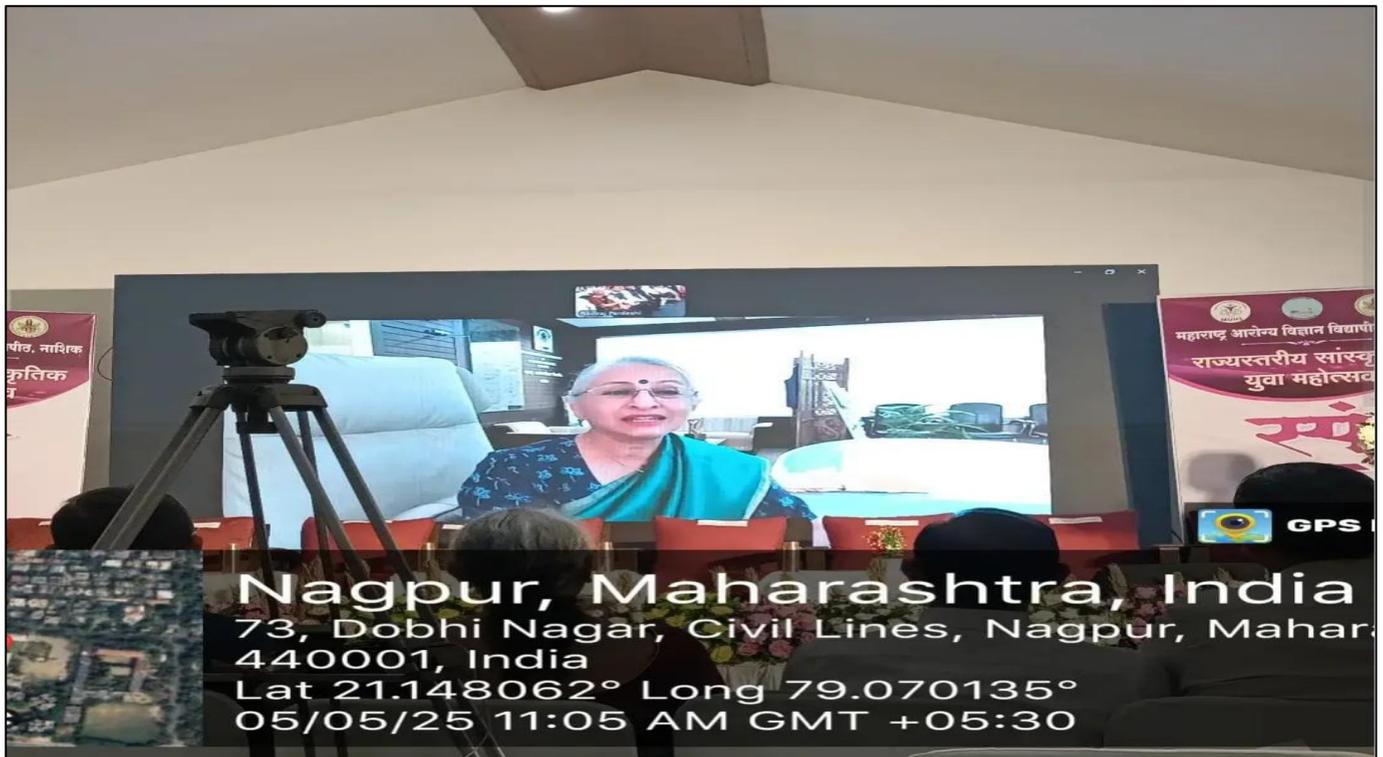

Audiovisual aids, as a teaching strategy, promote a change from the traditional educational system to an improved way of learning that integrates technological advances and resources to enhance education; this is why it is important to gather all the existent information about the topic, because we need. advanced learning method.

**International conference**

## Video Conferencing

## PROBLEM SOLVING:

Student learns to look at challenges from a fresh perspective. Therefore, they take more calculated risks. If students practice problem solving consistently, they can develop greater situational and social awareness. Additionally, they learn to manage time and develop patience.

### Case studies:

Case studies are a problem-based learning which engaging students and presenting them with learning-related and cognitive challenges. The purpose of the study was to elucidate nursing students through experiences and case studies as an educational tool in order to find out it supports their learning.

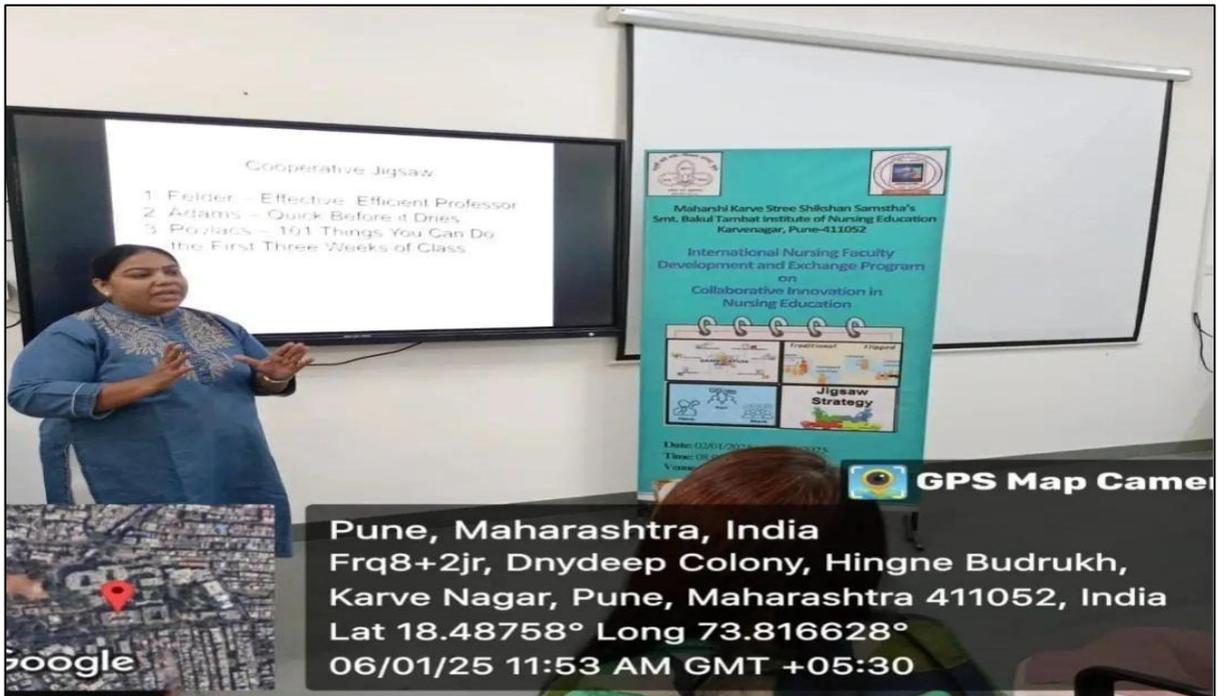

### Nursing care plan:

Nursing care plans are a vital part of the nursing process. They provide a centralized document of the patient's condition, diagnosis, and goals for that patient, and measure of the patient's progress. Care plans make it possible for interventions to be recorded and their effectiveness assessed. Nursing care plans provide continuity of care, safety, and quality nursing care.

## Discussion on scope and impact on nurse practitioner

Discussion is an essential method of communication and learning. It helps individuals and groups to share ideas, solve problems, and make better decisions.

**PATIENT CENTRIC EBL:**

**International simulation**

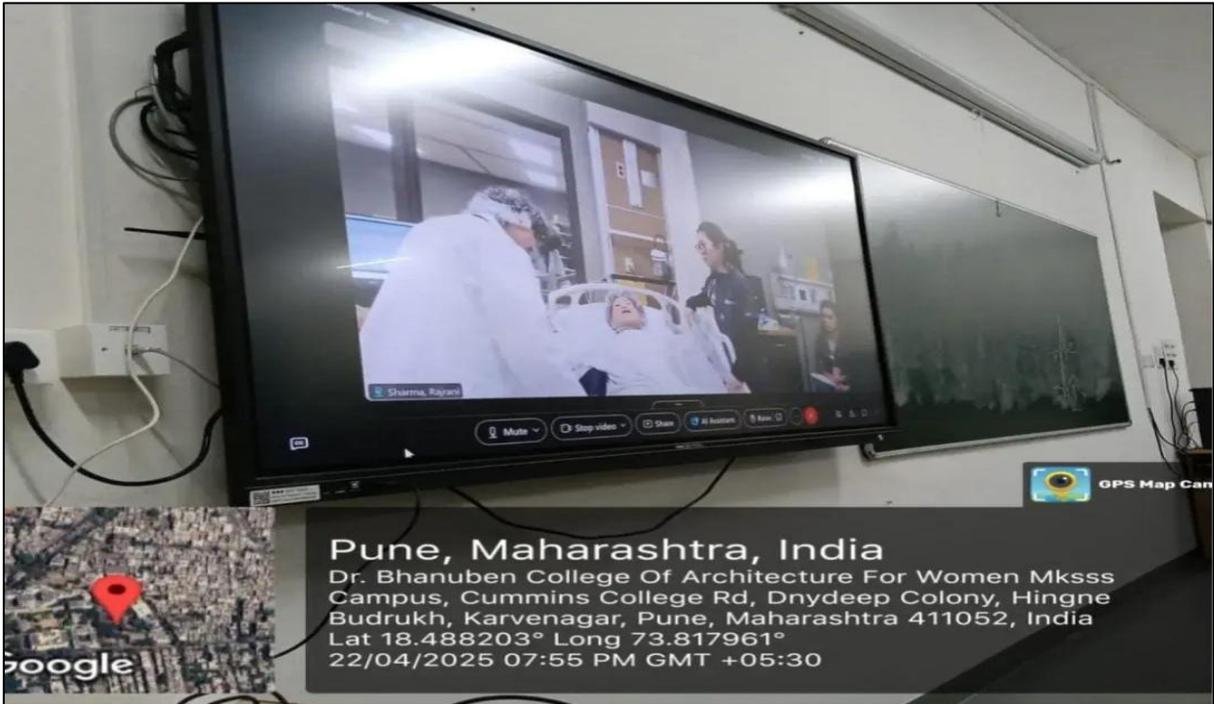

Simulation training provides an opportunity to apply theory and gain experience in skills or procedures that would otherwise be difficult without potentially putting patients at risk, such as managing emergency situations and resuscitation. Simulations are an educational process that can replicate clinical practices in a safe environment.

## LEARNING IN HUMANITIES

### Health education

To be effective health educators, nurses need skills in planning and implementing attractive and effective programs for students. Health education provides many opportunities for school nurses to reach out in new and creative ways to students in their quest to promote health and success in the school environment.

## ROLE PLAY:

By improving students' knowledge about different situations and decreasing their stresses, role-playing can improve students' performance in a clinical environment. This method improves self-confidence and motivation for learning in students and consequently leads to better outcomes for patients.

### Street play

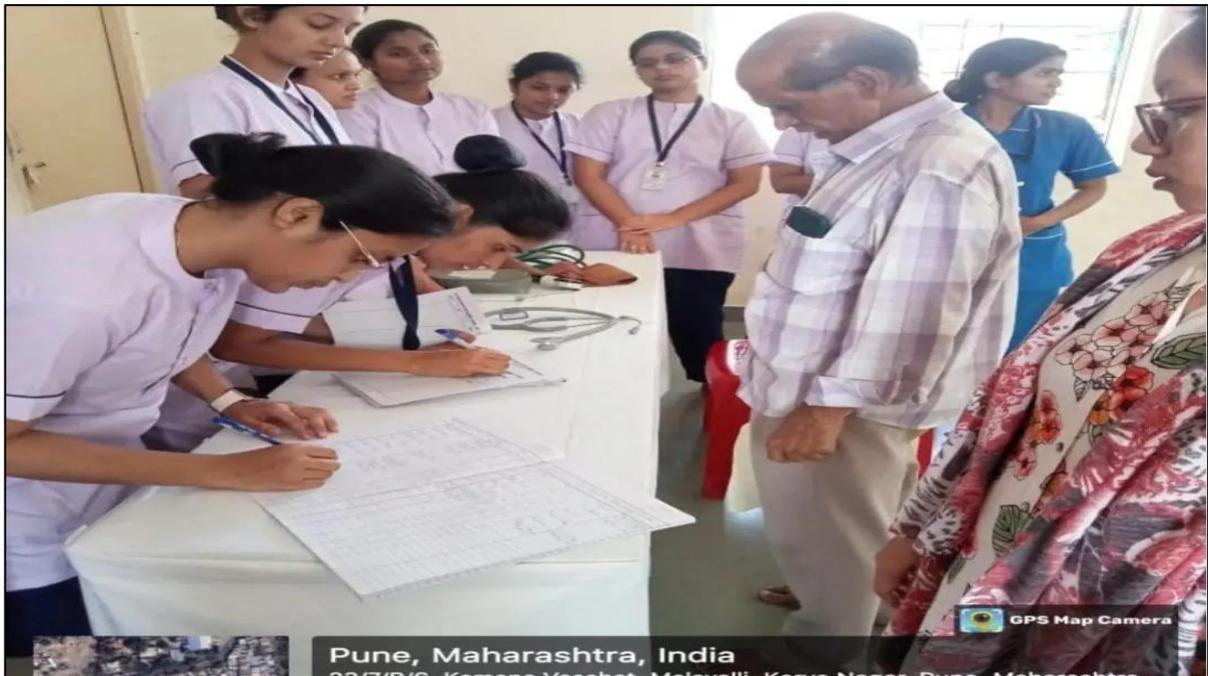

## Health Rally

By arranging health rallies students can explore their ideas and they care to share their knowledge with the people through rallies. Telling slogans to students can increase awareness in people regarding health.

## Health camp

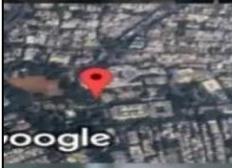

health camp is a temporary setup where nurses and other health workers provide screening, health education, basic treatment, referrals, and awareness services to a community.

## PROJECT BASED LEARNING

### Research project presentation

Practice that has been shown to be effective through research allows nurses to better advocate for patients and provides the best possible care. Nursing research is an emerging and growing field in which individuals can apply their nursing education to discover new advancements that promote evidence-based care.

## INTEGRATED/INTERDISCIPLINARY LEARNING:

### LESSON PLAN:

Lesson plans are important because they provide a clear understanding of what will be taught, how it will be taught and evaluated, and how much time can be dedicated to each objective. It provides an in-depth look into the lesson to ensure the content is approached in a logical and organized manner. Lesson planning helps you differentiate and plan for the many different ability levels and needs of students in your classrooms. Lesson plans also help serve as documentation that we're doing the best things with our young children.
